Catalyst – The Prentice Hall Custom Laboratory Program for Chemistry

Lab Notebook (required): "Customized Lab Record" from the USU bookstore (carbon-copy pages absolutely necessary)

Course Objectives: Chem 1225 laboratory experiments are designed to cover a range of general chemistry concepts covered in the Chem 1220 lecture course. The experiments deal with the determination of chemical composition and characteristics, acid/bases and their salts, spectroscopy, the characterization of reactions, and electrochemistry.

Chem 1225 Policies, Fall 2007

Safety: All students must read and sign the Utah State University Chemistry and Biochemistry Departmental *Laboratory Safety Agreement* before beginning lab experiments.

Attendance: Students must be registered for the lab section they are attending. Failure to do so will result in no grade being assigned (that's an F). The Individual lab sections are managed and graded by the Teaching Assistants in charge.

Missed Labs: These cannot be made up. Students may not attend other sections of the course. A single missed lab will be excused and grades will be averaged excluding the missed lab. Further absence from lab (unexcused) will result in a 0 grade for the lab and may constitute grounds for an "Incomplete" grade for the course. Grades for students who do not miss any labs will be the average excluding the lowest lab grade.

PreLab Work: Except for the first week of labs, the beginning of lab work will require a completed PreLab assignment. ***The PreLab (one page limit) is written in the student's lab notebook and the carbon-copy is torn out and turned in to the TA at the beginning of the lab.*** Permission will then be given for the student to begin work on the day's experiment. Incomplete or sloppy work will result in a delayed start and may result in incomplete experiments. The TA's are required to close the labs in a timely fashion due to significant time and space limitations.

Notebooks: Students are required to keep an organized record of lab work in their lab notebooks. All work done in the lab must be summarized in the note book. *No writing on the lab report forms is permitted during the lab periods.*

At the completion of each lab period, each student is required to hand in a copy of their lab notebook page. Each page must be signed and dated. These pages, along with the Lab Report, will be evaluated by the TA. Lab Reports will receive no credit in the absence of the lab notebook copies.

Original notebook pages must not be removed from the binder. No blank pages may be left between lab entries and PreLab entries. All notebook entries must be in ink. Incorrect entries and mistakes should be crossed out and followed by correct entries.

Lab Reports: The grade in Chem 1225 is largely based on the completion of lab report forms in the Nelson/Kemp Lab text. In addition to completing the assigned experiments, there may be additional questions to be answered at the end of the report form.

Lab reports are due no later than one week following the actual experimental work. ***Students are to turn in the actual report forms from the Lab Text.*** Grading will reflect completeness, accuracy, and correspondence to the lab work documented in the notebook pages turned in at the completion of the lab. Late reports will be assessed a 10% penalty per week.

Grading: A score of 90% or better earns an A- and 95% an A. The course will be graded on a curve.

10 (best of 11) PreLab @ 10 pts.....	100 points
11 (best of 12) Lab notebook sets @ 10 pts.....	110 points
11 (best of 12) Lab reports @ 80 pts.....	880 points
4 quizzes @ 25 points each	100 points
TA Evaluation (safety, cooperation, independence).....	100 points
Total.....	1290 points

Grades will be submitted electronically when available.
